## AUDITOR'S REVIEW REPORT OF INTERIM CONDENSED CONSOLIDATED FINANCIAL INFORMATION

To the Board of Directors of Privatization Holding Company – K.P.S.C.  
State of Kuwait

### *Introduction*

We have reviewed the accompanying interim condensed consolidated statement of financial position of Privatization Holding Company – K.P.S.C. ("the Parent Company") and its subsidiaries (together referred to as "the Group") as at 30 June 2018, and the related interim condensed consolidated statements of income, comprehensive income, changes in equity and cash flows for the six months period then ended. The Parent Company's management is responsible for the preparation and fair presentation of this interim condensed consolidated financial information in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34"). Our responsibility is to express a conclusion on this interim condensed consolidated financial information based on our review.

### *Scope of review*

We conducted our review in accordance with the International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the entity". A review of interim condensed consolidated financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### *Conclusion*

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial information is not prepared, in all material respects, in accordance with IAS 34: Interim Financial Reporting.

### **Report on other legal and regulatory requirements**

Furthermore, based on our review, the interim condensed consolidated financial information is in agreement with the books of account of the Parent Company. We further report that nothing has come to our attention indicating any violations of the Companies Law No. 1 of 2016, as amended, its Executive Regulations, nor of the Parent Company's Memorandum of Incorporation and Articles of Association, as amended, have occurred during the six months period ended 30 June 2018, that might have had a material effect on business of the Group or its consolidated financial position of the Group.

**1. GENERAL INFORMATION**

Privatization Holding Company – K.P.S.C. (the “Parent Company”) is a Kuwaiti shareholding Company registered on 10 October 1994 and is listed on the Kuwait Stock Exchange.

The Parent Company is licensed to:

- Invest in Kuwaiti and foreign shareholding companies and limited liability companies and to participate in the establishment and management of such entities,
- Lend to such entities and act as their guarantor,
- Utilization of excess funds in investment in financial portfolios or real estate portfolios through specialised parties inside or outside Kuwait,
- Invest in real estate, hold patents and copy rights, and advance loans to associates,
- Represent foreign consulting firms in local market.

The Parent Company’s registered office is located in Sharq, Ahmad Al-Jaber Street, Dar Al-Awadi Tower, 23rd Floor, and P.O. Box 4323, Safat 13104, Kuwait.

The interim condensed consolidated financial information of the Group for the six months period ended 30 June 2018 were authorised for issue in accordance with a resolution of the Board of Directors of the Parent Company on 12 August 2018.

**2. BASIS OF PREPARATION**

These interim condensed consolidated financial information have been prepared in accordance with IAS 34 Interim Financial Reporting, and should be read in conjunction with the Group’s last annual consolidated financial statements as at and for the year ended 31 December 2017 (‘last annual financial statements’). They do not include all of the information required for a complete set of IFRSs financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group’s financial position and performance since the last annual financial statements. This is the first set of the Group’s financial statements where IFRS 15 and IFRS 9 have been applied. Changes to significant accounting policies are described in Note 2 (A and B).

**Use of judgements and estimates**

In preparing this interim condensed consolidated financial information, management has made judgements and estimates that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgements made by management in applying the Group’s accounting policies and the key sources of estimation uncertainty were the same as those described in the last annual financial statements, except for new significant judgements and key sources of estimation uncertainty related to the application of IFRS 15 and IFRS 9, which are described below.

The Group has an established control framework with respect to the measurement of fair values. This includes a valuation team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the Group’s Chief Financial Officer.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments.

## **2. BASIS OF PREPARATION (CONTINUED)**

### **Use of judgements and estimates (continued)**

If third party information, such as broker quotes or pricing services, is used to measure fair values, then the valuation team assesses the evidence obtained from the third parties to support the conclusion that these valuations meet the requirements of IFRSs, including the level in the fair value hierarchy in which the valuations should be classified. Significant valuation issues are reported to the Group's audit committee.

When measuring the fair value of an asset or a liability, the Group uses market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in Note 20.

### **Changes in significant accounting policies**

Except as described below, the accounting policies applied in this interim condensed consolidated financial information are the same as those applied in the Group's consolidated financial statements as at and for the year ended 31 December 2017.

The changes in accounting policies are also expected to be reflected in the Group's consolidated financial statements as at and for the year ending 31 December 2018.

The Group has initially adopted IFRS 15 Revenue from Contracts with Customers (see A below) and IFRS 9 Financial Instruments (see B below) from 1 January 2018. A number of other new amendments are effective from 1 January 2018 but they do not have a material effect on the Group's interim condensed consolidated financial information.

#### **A. IFRS 15 Revenue from Contracts with Customers**

IFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognised. It replaced IAS 18 *Revenue*, IAS 11 *Construction Contracts* and related interpretations, IFRICs 13, 15, 18, and SIC 31.

Adoption of IFRS 15 by the Group at 1 January 2018 had no material impact on the Group's consolidated financial statements as at 31 December 2017 and the interim condensed consolidated financial information for the six months period ended 30 June 2018 as majority of the Group's revenues are within the scope of IFRS 15 as represented by the following:

**Privatization Holding Company – K.P.S.C. and its subsidiaries**  
**State of Kuwait**

**Notes to the interim condensed consolidated financial information (Unaudited)**

**2. BASIS OF PREPARATION (CONTINUED)**

**A. IFRS 15 Revenue from Contracts with Customers (Continued)**

***Contracting services:***

Revenue from engineering and construction service contracts are recognised over time using the percentage of completion method which in line with the recognition criteria required by IFRS 15 and accordingly, the Group has determined that over time recognition criteria remains appropriate for their engineering and construction service contracts.

The other revenue types of the Group are mainly represented by investments income and other income which are outside the scope of IFRS 15.

**B. IFRS 9 Financial Instruments**

IFRS 9 sets out requirements for recognising and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items. This standard replaces IAS 39 *Financial Instruments: Recognition and Measurement*.

The following table summarises the impact of transition to IFRS 9 and its impact on the opening balance of retained earnings (for a description of the transition method, see note below).

<u>30 June 2018</u>	<u>Notes</u>	<u>Impact of adopting IFRS 9 KD</u>
Fair value reserve	14	4,280,850
Provision for doubtful debts	11	(2,928,820)
Non-controlling interest		4,975
Investment in associates	6	(703)
Retained earnings (net)		<u>1,356,302</u>

The details of new significant accounting policies and the nature and effect of the changes to previous accounting policies are set out below:

**i. Classification and measurement of financial assets and financial liabilities**

IFRS 9 largely retains the existing requirements in IAS 39 for the classification and measurement of financial liabilities. However, it eliminates the previous IAS 39 categories for financial assets of held to maturity, loans and receivables and available for sale.

The adoption of IFRS 9 has not had a significant effect on the Group's accounting policies related to financial liabilities. The impact of IFRS 9 on the classification and measurement of financial assets is set out below:

Under IFRS 9, on initial recognition, a financial asset is classified as measured at: amortised cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL. The classification of financial assets under IFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics.

**2. BASIS OF PREPARATION (CONTINUED)**

**B. IFRS 9 Financial Instruments (Continued)**

**i. Classification and measurement of financial assets and financial liabilities (continued)**

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

A financial asset (unless it is a trade receivable without a significant financing component that is initially measured at the transaction price) is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition.

The following accounting policies apply to the subsequent measurement of financial assets.

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in statement of income.
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses (see i (b)). Interest income, foreign exchange gains and losses and impairment are recognised in statement of income. Any gain or loss on derecognition is recognized in statement of income.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in statement of income. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to statement of income.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

**2. BASIS OF PREPARATION (CONTINUED)**

**B. IFRS 9 Financial Instruments (Continued)**

**i. Classification and measurement of financial assets and financial liabilities (continued)**

The effect of adopting IFRS 9 on the carrying amounts of financial assets at 1 January 2018 is described further below.

The following table and the accompanying notes below explain the original measurement categories under IAS 39 and the new measurement categories under IFRS 9 for each class of the Group's financial assets as at 1 January 2018.

				<b>Original carrying amount under IAS 39</b>	<b>New carrying amount under IFRS 9</b>	<b>Impact on Retained earnings on adoption of IFRS 9</b>
	<b>Notes</b>	<b>Original classification under IAS 39</b>	<b>New classification under IFRS 9</b>			
<b>Financial assets</b>						
Cash and cash equivalents		Loans and receivables	Amortised cost	6,983,487	6,983,487	-
Fixed deposits		Loans and receivables	Amortised cost	34,695	34,695	-
Other financial assets at amortised cost		Held-to-maturity investment	Amortised cost	1,502,156	1,502,156	-
Equity securities	a	FVTPL	FVOCI – equity instrument	122,343	122,343	41,310
Accounts Receivables and other debit balances	b	Loans and receivables	Amortised cost	25,199,249	22,270,429	(2,928,820)
Equity securities	c	Available-for-sale	FVOCI – equity instrument	15,235,361	15,235,361	-
Equity securities	d	Available-for-sale	FVTPL	24,911,570	24,911,570	4,239,540

(a) Under IAS 39, these equity securities were designated as at FVTPL because they were managed on a fair value basis and their performance was monitored on this basis. At 1 January 2018, as a result of adoption of IFRS 9, the Group has made an irrevocable election to recognise changes in fair value through other comprehensive income rather than profit or loss as these are strategic investments and the Group considered this to be more relevant.

(b) Trade and other receivables that were classified as loans and receivables under IAS 39 are now classified at amortised cost. An increase of KD 2,928,820 in the allowance for impairment over these receivables was recognised in opening retained earnings at 1 January 2018 on transition to IFRS 9. No trade and other receivables was recognised at 1 January 2018 on the adoption of IFRS 15.

**2. BASIS OF PREPARATION (CONTINUED)**

**B. IFRS 9 Financial Instruments (Continued)**

**i. Classification and measurement of financial assets and financial liabilities (continued)**

- (c) These equity securities represent investments that the Group intends to hold for the long term for strategic purposes. As permitted by IFRS 9, the Group has designated these investments at the date of initial application as measured at FVOCI. Unlike IAS 39, the accumulated fair value reserve related to these investments will never be reclassified to profit or loss.
- (d) These financial assets represent investments that the Group intends to hold for short term trading purposes. As permitted by IFRS 9, the Group has designated these investments at the date of initial application as measured at FVTPL with all gains and losses recognised in profit or loss.

**ii. Impairment of financial assets**

IFRS 9 replaces the ‘incurred loss’ model in IAS 39 with an ‘expected credit loss’ (ECL) model. The new impairment model applies to financial assets measured at amortised cost, contract assets and debt investments at FVOCI, but not to investments in equity instruments. Under IFRS 9, credit losses are recognised earlier than under IAS 39.

The financial assets at amortised cost consist of cash and cash equivalents, fixed deposits, accounts receivable and other debit balances.

Under IFRS 9, loss allowances are measured on either of the following bases:

- 12-month ECLs: these are ECLs that result from possible default events within the 12 months after the reporting date; and
- lifetime ECLs: these are ECLs that result from all possible default events over the expected life of a financial instrument.

The Group measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured as 12-month ECLs:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities, bank balances, and term deposits for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

The Group has elected to measure loss allowances for accounts receivable and other debit balances at an amount equal to lifetime ECLs using the simplified approach.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group’s historical experience and informed credit assessment and including forward-looking information.

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 90 days past due.

The Group considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- the financial asset is more than 180 to 365 days past due.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

**2. BASIS OF PREPARATION (CONTINUED)**

**B. IFRS 9 Financial Instruments (Continued)**

**ii. Impairment of financial assets (continued)**

***Measurement of ECLs***

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

***Credit-impaired financial assets***

At each reporting date, the Group assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

***Presentation of impairment***

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Impairment losses related to trade and other receivables, including contract assets, are presented separately in the interim condensed consolidated statement of income.

***Impact of the new impairment model***

For assets in the scope of the IFRS 9 impairment model, impairment losses are generally expected to increase and become more volatile. The Group has determined that the application of IFRS 9's impairment requirements at 1 January 2018 results in an additional impairment allowance as follows:

<b>Loss allowance at 31 December 2017 under IAS 39</b>	<b>KD</b>
Additional impairment recognised at 1 January 2018 on:	
Accounts receivable and other receivables as at 31 December 2017 (Note 11)	(2,928,820)

***Accounts receivable and contract assets***

The following analysis provides further detail about the calculation of ECLs related to accounts receivable and contract assets on the adoption of IFRS 9. The Group considers the model and some of the assumptions used in calculating these ECLs as key sources of estimation uncertainty.

The ECLs were calculated based on actual credit loss experience over the past 3-5 years. The Group performed the calculation of ECL rates for its customers.

Exposures within each group were segmented based on common credit risk characteristics such as credit risk grade, geographic region and industry, delinquency status, age of relationship and type of product purchased where applicable.

Actual credit loss experience was adjusted by scalar factors to reflect differences between economic conditions during the period over which the historical data was collected, current conditions and the Group's view of economic conditions over the expected lives of the receivables.

At 1 January 2018, as a result of adoption of IFRS 9, the Group recorded an additional provision for doubtful debts amounting to KD 2,928,820 (Note 11).

**2. BASIS OF PREPARATION (CONTINUED)**

**iii. Transition**

The Group has taken an exemption not to restate comparative information for prior periods with respect to classification and measurement (including impairment) requirements. Differences in the carrying amounts of financial assets and financial liabilities resulting from the adoption of IFRS 9 are recognised in retained earnings and reserves as at 1 January 2018. Accordingly, the information presented for 2017 does not generally reflect the requirements of IFRS 9 but rather those of IAS 39.

The following assessments have been made on the basis of the facts and circumstances that existed at the date of initial application.

- The determination of the business model within which a financial asset is held.
- The designation and revocation of previous designations of certain financial assets and financial liabilities as measured at FVTPL.
- The designation of certain investments in equity instruments not held for trading as at FVOCI.

**3. SUBSIDIARIES**

During the period, the Group reclassified 50% investment in “Privatization Engineering Company for General Trading Contracting - W.L.L.” from investment in subsidiary to investment in associate as management believes that the Group does not have significant power to control the investee but retains significant influence.

**4. BASIC AND DILUTED EARNINGS PER SHARE**

Earnings per share are computed by dividing the profit for the period by the weighted average number of shares outstanding during the period, excluding treasury shares.

Financial assets at fair value through other comprehensive income (“FVOCI”) comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognise changes in fair value through other comprehensive rather than profit or loss as these are strategic investments and the Group considered this to be more relevant. At 1 January 2018, as a result of adoption of IFRS 9, the Group elected to reclassify investments amounting to KD 15,235,361 and KD 122,343 from financial assets available for sale and financial assets at fair value through profit or loss, respectively (Note 2 B (i), 7 and 12).

Valuation techniques of financial assets at fair value through other comprehensive income (“FVOCI”) are disclosed in (Note 21).

At 30 June 2018, the Group held certain equity securities of related parties with a carrying value of KD 4,335,948 (31 December 2017: KD Nil, 30 June 2017: KD Nil) (Note 18).

Some equity securities classified as financial assets at fair value through other comprehensive income are registered in the name of a major shareholder of KD 2,880,996 (31 December 2017: KD Nil, 30 June 2017: KD Nil) (Note 18).

Financial assets at fair value through other comprehensive income amounting to KD 4,360,372 (31 December 2017: KD Nil and 30 June 2017: KD Nil) are secured against certain term loan (Note 15).

**21. FAIR VALUE MEASUREMENT**

**21.1 Fair value hierarchy**

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Financial assets and financial liabilities measured at fair value in the statement of financial position are grouped into three Levels of a fair value hierarchy. The three Levels are defined based on the observability of significant inputs to the measurement, as follows:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 fair value measurements are those derived from inputs other than quoted prices that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

## **21. FAIR VALUE MEASUREMENT (CONTINUED)**

### **21.2 Fair value measurement of financial instruments (Continued)**

Measurement at fair value

The methods and valuation techniques used for the purpose of measuring fair value are unchanged compared to the previous reporting period.

#### **(a) Quoted securities**

Quoted shares represent all listed equity securities which are publicly traded in stock exchanges. Where quoted prices in an active market are available, the fair value of such investments have been determined by reference to their quoted bid prices at the reporting date (level 1) and if the market for an investment is not active, the Group has established fair value by using valuation techniques (Level 3).

#### **(b) Managed funds**

The underlying investments in these private equity funds mainly represent foreign quoted and unquoted securities. Information for these investments is limited to periodic financial reports provided by the investment managers. These investments are carried at net asset values reported by the investment managers. Due to the nature of these investments, the net asset values reported by the investment managers represent the best estimate of fair values available for these investments.

#### **(c) Unquoted securities**

Unlisted securities are measured at fair value estimated using various models like discounted cash flow model, which includes some assumptions that are not supportable by observable market prices or rates.

#### **(d) Financial liabilities**

The Group does not have any financial liabilities at fair value.

#### **Level 3 fair value measurements**

The Group's financial assets classified in Level 3 use valuation techniques based on significant inputs that are not based on observable market data.

The financial instruments within this level can be reconciled from beginning to ending balances as follows:

**Notes to the interim condensed consolidated financial information (Unaudited)**

For the six months period ended 30 June 2018

---

**21. FAIR VALUE MEASUREMENT (CONTINUED)**

**21.2 Fair value measurement of financial instruments (Continued)**

Changing inputs to the level 3 valuations to reasonably possible alternative assumptions would not change significantly amounts recognized in the consolidated statement of income, total assets, total liabilities or total equity.

The impact on interim condensed consolidated statement of income and interim condensed consolidated other comprehensive income would be immaterial if the relevant risk variable used to fair value the level 3 investments were changed by 5%.

**22. COMPARATIVE AMOUNTS**

Certain comparative amounts have been reclassified to conform to the presentation in the current period. Such reclassification does not affect previously reported net assets, net equity and net result for the period.
